

Active Development Permit Applications - Submit a Comment

File No. / Applicant:

21-010 OCP ZN Cody Last as agent for Terratek Geo Testing Ltd.

Comments or Concerns:

The SPFA - OCP seeks to protect lands capable of producing food and agricultural products. I see the piecemeal erosion of agricultural capable lands in the vicinity of Riverside Rd. Residential and industrial development steadily occupy more of these lands. Can a residential dwelling supportive of agriculture be built on the existing 160 acre land holding without additional subdivision? Although these lands are currently not in agricultural production, it is the capability which needs protection for future generations.
