

2022 Budget - Capital Supplemental Item						
Title:	Share Shed Purchase (BBLF,CHLF, DCTS)				Recycling & Solid Waste	
Division:	Solid Waste				Regional Solid Waste Management - 500	
Type:	Capital - New				Low	
Description						
During construction of the new Tier 1 and Tier 2 manned transfer stations in 2014/2015 share sheds were incorporated into the design. In 2016 as part of the new front entrance upgrade a share shed was included at the North Peace Regional Landfill (NPRLF). These share sheds are heavily used at all PRRD sites and are popular amongst residents. Currently the Bessborough (BBLF) and Chetwynd (CHLF) landfills as well as the Dawson Creek Transfer Station do not have a share shed. This project is to have a 12'x24' shed brought to each site for use as a share shed. These three share sheds will complete our share shed network.						
Benefits						
By bringing these two sites into the share shed program, all PRRD transfer stations and landfills will have a share shed available to residents.						
Risks						
None at this time.
