

Dear Reader,

I am a resident of [REDACTED], raising a young family directly across from the subject property. I, along with my family and neighbours, oppose the proposed rezoning of 6414 Airport Road to permit manufacturing of wood pellets, composting and storage of wood shavings.

The existing operation is already an issue with loose sawdust and wood shavings collecting on the road and ditches, on our roof and gutters, coating our vehicles, collecting in our yard, driveway and inside of our home. The air quality, due to the dust and wood particles, is poor enough to make outdoor activity impossible without eye and lung irritation when the wind is blowing. Our family and neighbours have brought their concerns to the attention of the current land owners who have shown very little effort in resolving the issue, containing the existing materials or acknowledging concerns.

Please register my concern.

Thank you,

Tina Thompson
