To: Area C Director -Brad Sperling & PRRD Board Members
PO Box 810
1981 Alaska Ave.
Dawson Creek, BC
V1G 4H8

Dear Mr Sperling and members of the PRRD Board,

We write to you to confirm our intention of having 4 natural gas (sour wells) in the vicinity of the Old Hope Road, nominated for reclamation under the new orphan/ dormant gas well fund recently announced. Our request for reclamation has also been completed on the OGC website as was required.

The following sour gas wells are being nominated by a group of our community (from the Old Hope Rd) with the support , we would hope from our PRRD representatives. They are as follows: (map attached)

*Terra Wilder 07-02-084-20

*Predator Wilder 13-01-084-20

*Terra Wilder 15-02-084-20

*Terra Wilder 12-02-084-20

The 13-01 Predator well has the distinguished title of being either the 12th or 13th natural gas well drilled in the Province of BC in 1952. It has been abandoned but several linking pipelines remain in place and reclamation of the site has never been done. It truly is high time to deal with this site and clean it up!

The 07-02 Wilder site was first drilled in 1965, and re-entered again in 2006 but without success. As a result of this, the well was again "suspended" until 2014 when the casing was breached spewing 3% sour gas into the neighbouring homes for nearly two weeks before it was finally curtailed. It has since been abandoned but not reclaimed . It remains as a toxic zone with no vegetative growth on or around the site since 2014. It is time for this site to be cleaned up permanently and restored to its original state.

The final two wells, 12-02 and 15-02 were both drilled between 2003 and 2007 (we believe). Both 15-02 and 12-02 have been abandoned. 15-02 has not been reclaimed. The status of 12-02 is unclear.

The Old Hope residents have dealt with these gas well intrusions for far too long. It would be a true gesture of good will on the part of the PRRD to help us nominate these wells to the orphan/dormant gas well list presently under way. To have them finally dealt with and reclaimed from within the tenured zones around our homes and properties would be the ultimate sign of respect.

We thank you in advance for your attention to this matter.

Sincerely,
