Project	0044 Prespatou Transfer Station - Scale Replacement (Design)		
Department	Regional Solid Waste Management		
Version	1. Provisional Budget	Year	2021

Description

Description

The foundations at the Prespatou Transfer Station (PPTS) have begun to move. Movement in the lock block wall has caused the deck of the attendant building to heave approximately one foot. Additionally it appears that the Piles that support the scale have begun to shift causing the scale to contact some of the pipes. The movement is likely caused by drainage issues and water becoming trapped and saturating the ground. The project will asses the next steps required to repair the scale foundation

Benefits

The scale at the Prespatou transfer station is used frequently by the area's farming community for weigh bills. By maintaining a scale on site the same level of service can be provided to the community.

Risks

Should the scale foundation continue to fail, the use of the scale could be limited. If the scale is unusable the site would have to move to volume based tipping fees and the area would not have access to the scale for

Budget

	Total	2021	2022	2023	2024	2025
Expenditures						
All Expenditures
