Regarding the proposed extreme mud fest . As neighbouring residents, we would not like to have this go through . As a peaceful family we do not want to be disrupted by a 4 day ,every year event. The noise , the partying , and the road traffic is not ideal for the residents here . In fact most neighbouring residents own livestock of all sorts . We have also just recently had a fire that was human caused not far from us , and with dry conditions the way they are pose a risk. So we would kindly ask if it can happen somewhere else . Thank you for taking us into consideration.
